

CareerOS Industry Project Requirements

Project: AI Dashboard Challenge

Employer Partner: Microsoft

Duration: 12 weeks | Team Size: up to 24 students | Support: RM 5,000

1. Overview

Students will work with Microsoft's product team to design and build an interactive analytics dashboard using real, anonymized business data. The goal is to help business stakeholders make faster, more confident decisions by surfacing the metrics that matter most, clearly and visually.

2. Objectives

- Define 5-8 key business metrics relevant to the provided dataset
- Design and build an interactive dashboard prototype
- Validate findings with at least one round of stakeholder feedback
- Present a short business case for how the dashboard drives decisions

3. Team & Mentorship

Each team will be paired with a Microsoft mentor for two scheduled check-in sessions during the engagement. The university career office coordinates scheduling and collects weekly progress updates from the assigned team.

Scope of Work

4. Deliverables

- a) Working dashboard prototype (web-based, shareable link)
- b) Data preparation and methodology notes
- c) One-page business case summarizing key insights and recommended actions for stakeholders
- d) Final presentation deck (10-12 slides)

5. Data & Tools

Anonymized sample datasets will be provided by Microsoft at project kickoff. Teams may use any dashboarding tool they are comfortable with (Power BI, Tableau, or a custom web app). Source code and dashboard files must be submitted alongside the final presentation.

6. Milestones

- Week 2 - Metric definitions and data exploration plan approved
- Week 6 - Dashboard prototype v1 reviewed with mentor
- Week 9 - Stakeholder feedback round completed
- Week 12 - Final submission and presentation

Evaluation & Submission

7. Evaluation Criteria

- Clarity and relevance of chosen metrics (25%)
- Dashboard usability and visual design (25%)
- Depth of analysis and quality of insights (30%)
- Presentation and business communication (20%)

8. Submission Instructions

Submit your project link (dashboard + repository) and any supporting package files through the CareerOS project page for this challenge. Include the full team name and a short summary note with your submission.

9. Support & Contact

For questions during the engagement, contact your assigned university career office coordinator, who will liaise directly with the Microsoft mentor team on your behalf.
